Giorgi Samukashvili

SENIOR RUBY ON RAILS ENGINEER

Email: giorgisamo@gmail.com **Location:** Tbilisi, Georgia

WORK EXPERIENCE

SENIOR RUBY ON RAILS ENGINEER • VIAN

01/03/2025 - PRESENT
Tbilisi, Georgia

- Designed, developed, and maintained Ruby on Rails backend services for healthcare systems involving bookings, patient information, medication catalogs, pricing calculations, insurance coverage, billing workflows, and external integrations.
- Developed REST APIs and HL7 FHIR-based integrations for healthcare partners and external vendors.
- Worked with PostgreSQL and Microsoft SQL Server, including complex queries, legacy data structures, query optimization, and reporting logic.
- Optimized background processing workflows using Sidekiq, reducing data synchronization latency and ensuring real-time updates for healthcare partners.
- Collaborated with product, QA, support, and business teams to deliver reliable software for hospitals and clinics.

SENIOR RUBY ON RAILS ENGINEER • VABACO

01/09/2022 - 28/02/2025
Tbilisi, Georgia

- Developed and maintained backend systems using Ruby on Rails for large-scale healthcare and business applications.
- Designed service-oriented backend architecture for workflows involving hospitals, clinics, doctors, patients, billing, pharmacy, insurance, and administrative processes.
- Built and optimized APIs used by internal systems, external vendors, and partner integrations.
- Identified and resolved database bottlenecks via query optimization and indexing, improving API response times across legacy healthcare platforms using PostgreSQL, Microsoft SQL Server, and ActiveRecord.
- Participated in technical planning, code reviews, debugging, production issue investigation, and performance improvements.
- Mentored junior developers and supported continuous improvement of backend development practices.

SOFTWARE ENGINEER • VABACO

01/09/2020 - 31/08/2022
Tbilisi, Georgia

- Developed backend features using Ruby on Rails for healthcare-related software systems.
- Implemented API endpoints, database models, service objects, validations, and business workflows.
- Worked with PostgreSQL, Microsoft SQL Server, ActiveRecord, Redis, Sidekiq, and Elasticsearch.
- Investigated and fixed bugs, improved existing features, and supported production systems.
- Wrote RSpec tests for controllers, models, services, and business logic.

JUNIOR SOFTWARE ENGINEER • VABACO

01/09/2018 - 31/08/2020
Tbilisi, Georgia

- Assisted in developing and maintaining Ruby on Rails backend applications.
- Implemented smaller backend features, bug fixes, database changes, and internal improvements.
- Worked with Ruby, Ruby on Rails, PostgreSQL, ActiveRecord, JavaScript, HTML, CSS, and Git.
- Learned and applied software engineering practices including code reviews, testing, debugging, and version control.
- Supported existing systems by investigating issues and working closely with more experienced engineers.

EDUCATION & TRAINING

Master's Degree in Computer Science

Ivane Javakhishvili Tbilisi State University • 2018 - 2020

Advanced CS, system design, databases, software engineering. (EQF Level 7)

Bachelor's Degree in Computer Science

Ivane Javakhishvili Tbilisi State University • 2014 - 2018

Algorithms, data structures, databases, practical software development. (EQF Level 6)

Certified Ruby Programmer (Silver)

Ruby Association, Japan • 2022

OOP, syntax, standard libraries, modules, and core architecture concepts.

Advanced English Language Studies

George Byron School of Tbilisi • 2004 - 2012

Advanced written and spoken communication proficiency.

SKILLS

Backend Languages & Frameworks

Ruby · Ruby on Rails · Backend development · Object-oriented programming · JavaScript · Node.js · Express.js

Databases, Infrastructure & Caching

PostgreSQL · Microsoft SQL Server · SQL · Database design · Database query optimization · ActiveRecord · Redis · Sidekiq · Elasticsearch · Docker

Architecture, APIs & Integration

Software architecture · Service-oriented architecture · REST API · API development · HL7 FHIR · System integration · Healthcare information systems

Engineering Practices & Leadership

RSpec · Test-driven development · Git · Refactoring · Debugging · Performance optimization · Code review · Problem solving · Team collaboration · Mentoring and leadership · AI-assisted coding (Claude)

LANGUAGE SKILLS

Mother tongue: GEORGIAN
